“Q and A” for Students and Parents

Question One: What are the major legal differences between high school and college?

Short Answer: Entitlement vs. Eligibility

It is important to remember that disability laws for high school students focus on “success” while applicable laws for postsecondary disability services focus on “equal access.” IDEA does not apply to college students!

Let’s look at two specific laws and students with disabilities in college.

• Section 504 of the Rehabilitation Act of 1973

• Americans with Disabilities Act (ADA)

Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act require that,

No otherwise “qualified” individuals with disabilities in the United States . . . shall solely by reason of his disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. (29 U.S.C. 794)

A person with a disability is an individual with a physical or mental impairment that substantially limits one or more major life activities. An individual is considered to be a person with a disability if he/she (1) has a disability, (2) has a history of a disability, or (3) is perceived by others as having a disability.

Individuals must also be viewed as “otherwise qualified” despite the disability. In other words, unlike elementary and secondary students, postsecondary students must be qualified for acceptance to the college by meeting the admissions criteria, and fulfilling the requirements for staying in college. In addition, the student must also meet essential technical requirements of the program or course.

Reasonable accommodations are also referred to as “academic adjustments” and “auxiliary aids.” These accommodations are designed to level the playing field for students with documented disabilities. The law requires postsecondary institutions to provide equal access to courses and course materials so that the student with
documented disabilities is allowed equal participation in his or her educational experience. Some examples of reasonable accommodations include extended time on tests, testing in a minimally distractive environment, and use of assistive technology. It's important to note that academic adjustments are determined based on individual disabilities and individual needs. In providing these adjustments, colleges are not required to lower or effect substantial modifications to essential requirements. For example, it may be a reasonable accommodation to allow a student extended time for a test, but it is not a requirement to change the substantive content of the tests. Also, a college does not have to make any modifications that would fundamentally alter the nature of a service, program or activity. Postsecondary institutions do not have to offer services that would result in undue financial or administrative burdens and colleges do not have to provide services of a “personal” nature.

❖ **Question Two:** What are some general differences between high school and college?

**Short Answer:** High school students tend to take a passive role and depend on their parents and the “system” to meet their needs. College students take an active role and must “step to the plate” and accept responsibility for ensuring that their needs are met.

You may pass with a D or higher
I.E.P. or 504 plans
School provides evaluation
School identifies students with disabilities
Course modifications
Grading modifications
Parents may monitor grades and progress

A grade of C to pass or have a certain GPA to graduate
Each college has documentation guidelines for a disability
You provide evaluation and documentation from a qualified professional
You must self-identify to office of disability services
Reasonable accommodations
No grading and few test format changes
Grades and progress are confidential

ший Question Three: What can help me be successful in college?

Short Answer: Commitment! Attend class & utilize tutoring center 3 hours daily.

Recommended Academic Supplies

Flash drive
Textbooks should be ordered after your schedule is completed
Day Planner
Highlighters
College dictionary and thesaurus
Black pens/pencils, erasers and colored pencils
Notebook, paper, graph paper
Three ring binder and subject dividers
Index Cards
Scotch tape
Computer (computer labs on campus and Focus has a computer lab).

Recommended Personal Supplies

Cellular phone (Verizon is the only service provider that works in our area)
Insurance Information
Family/friends telephone contact list including emergency numbers
Student ID number (memorized)
Watch (Some students use “watchminders.” Check out www.watchminder.com.)
Alarm clock (Bring two if you tend to turn them off in your sleep!)
Laundry supplies (It helps if you know how to do your laundry, too!)
Prescribed medications and pillbox to sort them
Small safe box to lock prescribed medications and cash (just to be safe)
Bulletin board and wall calendar for organization
Comforter or bedspread, sheets, blankets, towels
Before you arrive….

1. Check to make sure that all of your paperwork is “in order” with financial aid, housing, business office, and Director of Disability Services.
2. Order your textbooks.
3. Contact your roommate and discuss who’s bringing what.

Other important things to think about and know when you arrive…

1. What are my specific disabilities and how they affect how I learn, work, and play?
2. What are my medications, how do I take them, why do I take them, and how do I refill them?
3. What do I do in bad weather?
4. How do I handle my budget? Do I know how to write checks and use a bankcard?
5. How do I do laundry?
6. Where do I go and what do I do if I am sick?
7. Who is my advisor? (Focus students: Mrs. Bennie C. Mattox)
8. What is my schedule and where are my classes?
9. Where is Focus? (Stop by Focus and say hi!!)
10. Where are the important offices/departments on campus and who do I contact for different issues?

❖ Question Four: How can parents help students?

Short Answer: Give them lots of “PR.” In other words, keep things in “perspective” and provide lots of “reassurance.”

Office of Disability Services Recommendations for Parents

Assist your student with self-advocacy skills before he/she leaves the nest. Ask yourself the following:
- Does my son/daughter know his/her rights under ADA and Section 504 and understand them?
- Does my son/daughter know how to ask for help?

Assist your student with disability awareness and ask the following:
- Does my son/daughter know and understand his/her disabilities?
- Does my son/daughter understand his/her documentation and is it current?
- Does my son/daughter know/understand his/her strengths and weaknesses?

Assist your student with specific accommodation needs and ask yourself:
- Does my son/daughter know which accommodations have worked in the past and which were not helpful?
- Does my son/daughter aware of and use assistive technology? Can he/she use a word processing program?
- Is my son/daughter registered with Vocational Rehabilitative Services?
Assist your student with becoming more independent….

- Ensure that they have independent “living” skills
- Encourage them to develop their own problem solving and decision making skills
- Correspond on a regular basis
- Send care packages and letters
- Enjoy the rewards of an “empty” or almost “empty” nest and value the “adult” relationship you can foster with your student!
- Ensure awareness and importance of medication management

“It is true love that allows us to let go and let our children have their own lives.”

Pauline Tague

❖ Question Five: How does the Focus Program help students?
Short Answer: Focus bridges the gap between I.D.E.A. and A.D.A. and empowers students to meet the challenge at Andrew College!

The Focus Program provides a safe, nurturing environment where students experience a sense of belongingness and learn to develop self-advocacy skills while mastering their academic goals.

In addition to the coordination of reasonable accommodations required by law, the Focus Program provides:

- A study/mentoring lab that is open 50-60 hours per week
- Minimally distracting testing center
- Private computer lab for Focus students
- Assistive technology
- Auxiliary aids
- Resource materials, study guides, lab supplies
- Priority Registration
- Focus Director serves as academic advisor
- Interim grade reports from professors
- Parent/Director limited communication
- Assistance in transfer to Senior institution
- Logistical support and coordination of special needs
- Disability support group
- Individual guidance in time management and organization
- Individual assistance with study skills and test taking techniques
- Academic/career/major consultation
- Assistance with specific course assignments and writing assignments

What Focus Can and Cannot Do…

We can
- Provide a supportive learning community
- Provide encouragement
Assist students in becoming more autonomous
Assist students in reaching their academic, social, and personal goals

**Focus cannot**
- Guarantee grades
- Force students to learn
- Force students to participate
- Do the “work” for students
- Lower academic standards for students
- Violate or “bend” any legal requirements for students

More helpful information…

- The determination of reasonable accommodations is very important in “leveling the playing field” for students with disabilities. It is imperative that the student’s documentation meets the documentation guidelines for Andrew College so that it can be established that the student has an official diagnosis of a disability and to demonstrate that the disability substantially limits a major life activity. The documentation is critical in determining the appropriate accommodations for the students in order to minimize the impact of the disability and personalize the student’s rights to equal access. In addition, the documentation assists the Focus Director in determining specific study strategies to assist the student in being successful in reaching academic goals.

- The Focus Director works directly with the student to determine appropriate and reasonable accommodations consistent with the student’s documentation. Accommodations are individualized and made specific to the student and the curriculum while adhering to all legal requirements. Students are given a reasonable accommodation form for each class, and it is the student’s responsibility to self-disclose his/her disability to his/her instructors and give the forms to the instructors at the beginning of each semester.

- The Focus Program does not mandate attendance although it is strongly encouraged and highly recommended. A student’s participation in Focus is voluntary so it is helpful when the parent and the student have an understanding about the importance of the student’s participation and cooperation with the Focus Program. Basically, students get out of Focus what they are willing to be put into Focus. We have found a significant positive correlation between the amount of time students spend in Focus and their academic success rate. In addition, the Focus Director is the academic advisor for all Focus students, and it is important that students initiate regular visits with the director in addition to the time that they spend working with the mentors in the Focus Lab.
• Students will be expected to participate in a Focus Program orientation upon their arrival at Andrew College in the fall. The program guidelines and requirements will be carefully explained and reviewed with the students.

• All incoming students who have been admitted on a conditional basis are required to take the COMPASS and test-recommended courses. Many Focus students test into learning support classes. There are two levels of learning support courses (081 and 091) for math, reading, and english. In order to pass the 091 classes, students must have a “C” in the class AND pass the COMPASS assessment at the end of the semester. There is also a writing component that students must pass in English 091 to pass the class. Students may not take a specific learning support course more than two times at Andrew College. For example, should a student fail Math 081 twice, the student will not be allowed to re-enroll in Andrew College until he/she passes Math 081 at another institution.

Our Philosophy
The mission of Andrew College is to provide an academically challenging liberal arts curriculum within a nurturing community.

The mission of The Focus Program is to empower our students to meet the challenge at Andrew College through the development of personal control and independence coupled with academic learning. The Focus Program facilitates the learning process for students with learning disabilities by promoting self-determination, self-advocacy, self-efficacy, and self-directed learning.

We believe in “teaching students how to learn.”
