

Andrew College is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award certificate, associate, and baccalaureate degrees. Questions about the accreditation of Andrew College may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur GA 30033-4097, by calling (404-679-4500), or by using information available on SACSCOC's website (www.sacscoc.org).

ANDREW
MEANS
FORESTRY

Ideally located in the commercial timber producing region of Georgia, Alabama, and Florida, the Forestry program at Andrew College is designed to train students to perform technical aspects of timber management and tackle everyday woodland operations. The program offers students a two year associate of science degree which provides the option to graduate and enter the job market or transfer to another institution to complete their bachelor's degree. The specialized program focuses on commercial forest management; however, students will learn all sides of forest resources management and can extend their career paths into forestry, natural resources conservation and management, fisheries and wildlife, forest business and other areas.

Curriculum/Coursework

Although the majority of classes are taught on campus, a significant portion of classes and labs will be taught outdoors. Field labs are carried out on various ecosystem and diverse forest management regimes. Andrew College has fostered great relationships with industrial and non-industrial landowners, public organizations, and private companies (e.g., lumber, pulp, paper and engineered wood products) who not only help run field labs, but also help our graduates find employment after graduation.

Scholarships

Check with the Financial Aid office to learn about any scholarships for which you may qualify, including an \$8,000 Forestry scholarship.

Internships

Students are required to take part in a supervised internship which allows them to see the theoretical concepts learned in the classroom in operation within the real world. The internship provides opportunities to learn from professionals and also provides excellent connections to future employers. In order to be prepared for these internships, students must maintain a 2.0 grade point average both overall and within their field. Many forestry internships are paid.

Career and Academic Options

The Forestry program may lead you to a wide range of traditional and non-traditional career and educational paths including

- Forester
- Forestry/Fisheries Technician
- Forest Ranger
- Game Warden
- Logger
- Forest Logging Supervisor
- Park Supervisor
- Nursery Manager
- Christmas Tree Farmer
- Lumber Miller
