

SUSTAINABLE AGRICULTURE

www.andrewcollege.edu

Sustainable Agriculture at Andrew College is an Associate of Science degree program that is comprehensive and interdisciplinary and provides the practical and theoretical skills necessary for a successful career in the agriculture industry. Based on regenerative production methods, the goal of the program is to prepare students to be entrepreneurs and highly skilled, trained workers in the growing field of sustainable agriculture.

Curriculum/Coursework

Our two-year program offers a vibrant, diverse and intellectually stimulating place to pursue a wide range of traditional and non-traditional career and educational paths such as agronomy, soil science, farm management, community leadership, environmental advocacy, agricultural journalism, research scientist and animal husbandry. Learn about animal and crop production, soil fertility management, as well as natural resource conservation, and farm management. Our community garden and a required internship between your freshman and sophomore years provide practical skills necessary for entry into the sustainable agriculture program.

Scholarships

Check with the Financial Aid office to learn about any scholarships for which you may qualify.

Internships

Andrew College currently partners with White Oak Pastures in Bluffton, Georgia, and Konoinia Farm in Americus, Georgia, which both provide unique opportunities for students to participate in 'living-laboratories.' Additional internship opportunities may be available.
